BMAC International Trade Ltd is focused on the development of British - Hungarian commercial relationships. We are an award-winning start-up wholesaler working across nations and generations to bring high quality Hungarian products to British consumers. Currently, we're focused on introducing our UK audience to authentic, premium quality honey and wine from Hungarian producers in both Hungary and Transylvania (Romania). Our advantage is in the wealth of personal knowledge and experience the founder and her family possess in wine and honey, as well as their lifelong connections with local beekeepers and winery owners. Quality is essential to us in every stage of production. That's why we choose to pack out honey in a Soil Association and BRC accredited British factory.

Brand Grade: Grade One
